Pure Facial Aesthetics hands-on Course

Exclusive hands-on course on Rejuvenation with the client’s own cells and growth factors without the use of additives - administered via mesotherapy and microinjections in the skin, wrinkles, neck, scars and lips.

Attend our hands-on course and learn how to include regenerative medicine in your treatments and use your patient’s own growth factors and stem cells - chairside.

Pure Facial Aesthetics is based on the latest generation of blood concentrates (PRF) using the i-PRF™ and Liquid A-PRF+™ protocols to bring cutting edge regenerative medicine into facial aesthetics and enable you to do regeneration and pain treatments.

The course will provide you with theory and an in-depth understanding on how to use the growth factors and stem cells - alone or in combination with fillers, botox or PDO Treads.

There will be a “How-To-Do” live demonstration of facial, lip and wrinkle treatment.

During the course the participants will have the opportunity do hands-on sessions on each other, and use techniques and handling of PRF in a the cosmetic setting.

Pure Facial Aesthetics is based on the Platelet Rich Fibrin protocols i-PRF™ and A-PRF™ Liquid.

i-PRF™ is used to regenerate the skin’s elasticity and rebuild the tissue through micro-needling and mesotherapy.

A-PRF™ Liquid using high fibrin content to create volume and is used for augmentation - naturally and without side effects.

The course is held in collaboration with Dr. Cleopatra Nacopoulos: The leading researcher on cosmetic PRF protocols and developer of the Cleopatra Technique™.
Program

- Welcome
- Aging processes and facial anatomy-physiology
- The principles of cells and growth factors in regenerative medicine
- Lunch
- Principles part 2
- Live demonstrations
- Hands-on training
- Certificates

Pure Facial Aesthetics setup

Injections based treatment
- PRF DUO Centrifuge preprogrammed
- PRF tubes: i-PRF™
- PRF tubes: A-PRF™
- Butterfly
- Veinlite
- Desinfection materials
- DermaPen
- Microinjections needles
- 1cc LL syringes
- 2cc syringes

Post injection treatment
- Hyaluronic acid Peptide Mask, Genosys
- Geno-LED Low Level Light Therapy, Genosys

Liquid Advanced Platelet Rich Fibrin (A-PRF™ + liquid)
injectable Platelet Rich Fibrin (i-PRF™)
Facial Aesthetics - the pure bio-logic approach

Dr. Cleopatra Nacopoulos  
BSc, DDS, MSc, PhD.

Has since 2003 performed Facial Aesthetics treatments using growth factors from blood concentrates (PRP) and using fillers, botox and PDO Threads.

Has in the past couple of years made the shift to i-PRF™ in close relationship with Dr. Joseph Choukroun. Work today with i-PRF™ and Liquid A-PRF™ and PDO Thread with remarkable results.
